Objective

Entry-level **AI Engineer** skilled in building **LLM-powered applications** — **RAG pipelines** and **autonomous AI agents** — with **Python**, **LangChain**, and **Docker-based deployment**. Seeking to build production-grade **agentic AI systems**.

Education

Dr. D Y Patil's Ramrao Adik Institute of Technology

July 2023 - June 2026

Bachelor of Technology Computer Science And Business System (CGPA of 8.66)

Navi Mumbai, India

Experience

Infinion Consultancy Pvt. Ltd.

Dec 2025 – June 2026

Enterprise GRC Platform Developer (Intern)

Navi Mumbai, India

- Developed an **enterprise GRC platform** on Onfinity, **integrating multiple data sources** and mapping them to **NIST CSF 2.0** and **ISO 27001:2022** models.
- Built **role-based dashboards** for executives (CEO, CFO, CRO, CISO), operationalizing **93 ISO 27001 controls** and **106 NIST CSF 2.0 subcategories** via **CVSS**, **STRIDE**, and **MITRE ATT&CK**.
- Delivered **real-time compliance and audit-readiness tracking** across five frameworks.

Projects

ChatPDF – AI Document Q&A (RAG) | *Python, LangChain, ChromaDB, Hugging Face, Mistral AI, Streamlit*

- Built an end-to-end **RAG pipeline** for PDF Q&A using **Hugging Face embeddings** in a **ChromaDB** vector store with **MMR retrieval** for relevant, diverse context.
- Integrated **Mistral AI** with **prompt engineering** for source-grounded answers, served via an interactive **Streamlit** app.

Research Agent – Autonomous AI Web Assistant | *Python, LangChain, Tavily API, BeautifulSoup, Mistral AI*

- Engineered an **autonomous agentic AI system** using **LangChain agents**, orchestrating **Mistral AI** to plan, search via **Tavily API**, scrape with **BeautifulSoup**, and synthesize real-time web research without human intervention.
- Architected reliable agent execution through **tool orchestration**, **prompt engineering**, and **iteration guardrails** to prevent runaway loops and ensure source-grounded output.

InboxPilot – Email-to-Action Workflow Agent | *Python, LangChain, Mistral AI, Mail API, Google/Outlook Calendar, Jira*

- Built an **agentic AI system** with **LangChain** that connects to a live inbox, summarizes incoming emails using **Mistral AI**, and extracts actionable items with high accuracy.
- Engineered tool integrations to auto-create **calendar events** (Google/Outlook) from detected meetings and **Jira/Outlook tasks** from assigned action items, eliminating manual triage.

Technical Skills

Languages: Python, C#, C++

AI/ML: LangChain, RAG, Prompt Engineering, Hugging Face, Mistral AI, OpenCV, scikit-learn, Pandas, NumPy

Tools & Databases: ChromaDB, Tavily API, Streamlit, PostgreSQL, Docker, Git

DevOps & Cloud: Docker, Kubernetes, AWS (EKS, EC2, IAM, ELB)

Concepts: LLMs, Agentic AI, RAG, Vector Embeddings, MMR Retrieval, Prompt Engineering

Leadership & Achievements

- * **Tutude Web Dev Hackathon (2025)** – *6th / 3,000+ Participants*: Led team to build *BazaarSetu*, a digital storefront for local vendors.
- * **KLEOS 3.0 National Hackathon – Finalist** | RAIT ACM: Reached finals in a 24-hour national-level prototyping challenge.
- * **Bharatiya Antariksh Hackathon 2025 – Certificate of Acknowledgement** | ISRO: Led team on AI/ML *Forest Fire Spread Simulation*.
- * **GDSC Hackathon – Top 11 Finalist** | Google Developer Student Club, RAIT: Built an E-Waste Management app using **Flutter**.

Certifications

- * AI/ML Geodata & Geo-spatial Analysis via Google Earth Engine (IIRS, ISRO) | Google Cloud Training GCCF1x-4x | SQL Courses (DataCamp)
